

Easy just got easier!

with the **NEW** Viterion® 200 TeleHealth Monitor*

With the Viterion 200 you can do everything the Viterion 100 does.
In addition, with the Viterion 200 you can:

- **Make it easier** for the patient to connect the monitor to the server with a land line or with a wireless GSM (cell phone)
- **Make it easier** for patients with visual impairment with the “text to speech” feature - the talking monitor!
- **Make it easier** for you to mail the monitor to patients - It's lightweight and easy to install
- **Make it easier** for patients to connect peripherals with wireless (Bluetooth®)
- **Further promote patient self management** by creating advice messages and questions which can branch off of vital signs

Viterion 200 Telehealth monitor can be used to measure the following vital signs**

- Weight - Wireless Bluetooth
- Blood Oxygen - Wireless Bluetooth
- Blood Pressure and Pulse - Wireless Bluetooth
- Blood Glucose - Cable/Infrared
- Peak Flow - Cable Connection
- Asthma - Wireless Bluetooth
- PT/INR - Infrared
- ECG - Wireless Bluetooth
- Pain - Manual Entry
- Temperature - Manual Entry
